

Honeycutt Science

Day-3 Lesson
(Build Presentation)

Objectives

At the end of today's lesson, you should be able to:

- Speak-to a portion of your team's presentation
- Anticipate possible questions about your content (*)
- Share responsibility and *manage-time* as a small team

(*) think through concepts, words, or facts that may be confusing to an audience member. Include ways to simplify your subject to the class (your audience).

Agenda

Prepare

retrieve a rubric

5-10

Discuss / Agree

quickly discuss and agree-upon a subtopic for the team

3-5

Delegate

assign members portions of the project

25-40

Create *

create required pages and team's content pages

5-10

Finalize

assemble pages – perform a “run-through” practice if possible

Conclude

turn-in team pdf file and rubric

(*) time management is imperative on this assignment. Collaboration and compromise are crucial skills during this activity – along with reinforcement of the science content.

Tips / Reminders

1

Each step on the agenda will ideally be “time-boxed.” Don’t over-spend your time discussing, planning, and selecting a topic.

2

Avoid failure to include required slides – especially the citations slide.

3

Consider leaving enough time at the end to perform a “dress-rehearsal” of the content – practicing the sequence, timing, and “who-does-what.”
