Shading Fractional Parts

The figure has a total of 16 parts. Five parts are shaded. This figure represents the fraction $\frac{5}{16}$.

Shade each figure to represent the given fraction.

Draw and shade figures to show $\frac{2}{10}$, $\frac{1}{4}$, $\frac{3}{13}$ and $\frac{10}{20}$.

Word Names for Fractions

There are special rules that you use when writing or reading fractions.

Rule 1: Read or write the numerator first. Say or write it just as you would a whole number.

Rule 2: Read or write the denominator second. Denominators are written or read with special endings. These endings are the same ones you would use to read a numbered street name. For example, 5th Avenue is read and correctly written as Fifth Avenue.

If we use these rules:

$\frac{5}{7}$ The numerator is read and written as "five."

The denominator is read and written as "sevenths."

Therefore, the fraction is read and written as "five sevenths."

Example: $\frac{6}{11}$ is read and written as "six elevenths."

| DENOMINATOR SPELLING CHART | | | | |
|----------------------------|------------|------------|------------|-----------|
| half | third | fourth | fifth | sixth |
| seventh | eighth | ninth | tenth | eleventh |
| twelfth | thirteenth | fourteenth | fifteenth | sixteenth |
| seventeenth | eighteenth | nineteenth | twentieth | thirtieth |
| fortieth | fiftieth | sixtieth | seventieth | eightieth |
| ninetieth | hundredth | | | |

Write the word names for the fractions below. The spelling chart may help you spell the denominators

1. $\frac{22}{80}$ _____
3. $\frac{2}{17}$ _____
5. $\frac{5}{90}$ _____
7. $\frac{8}{30}$ _____
9. $\frac{55}{69}$ _____
11. $\frac{34}{48}$ _____

2. $\frac{12}{60}$ _____
4. $\frac{18}{27}$ _____
6. $\frac{70}{100}$ _____
8. $\frac{17}{70}$ _____
10. $\frac{1}{99}$ _____
12. $\frac{7}{100}$ _____
