

From: Honeycutt  
To: You

Okay, good & smart student ... this is how science is going to go-down this summer. You, me, and all of those other good students will take a trip. We will take a new journey each week.

Week 1 – Maps

Week 2 – Weather

Week 3 – Geology

Week 4 – Space

These four super-cool topics cover highlights of Earth & Space science.

Hey! Some students already know me from last year. Last year I taught business and marketing. For all y'all – hey! Good to see you!

As an aside (*spoken in an authoritative low voice*) ... I was a business man for a long time before I became a teacher. But, way ... way ... way ... back a long ... long time ago in the olden days, I was a scientist. My first college degree was in geology. My first professional job was in a lab. I was a petrophysicist. I enjoy science a lot. I get to teach science during the normal school year at Keota. I am super stoked I get to teach science to you!!

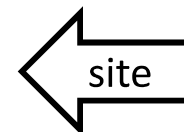

Okay ... back to a regular, introspective voice ..  
“I am a very lucky man. Very lucky. Lucky in-deed!”

---

**Instructions for your science extravaganza are found here:**
